Interchangeable Cables in Stainless Steel

Our Stainless Steel Cables do so many things at once and they do it all so well!!!

First, they are strong and flexible since they are made of finest grade stainless steel strands. The cable's nylon coating is silky smooth and colour coordinated with The Mindful collection – a soothing teal colour. As importantly, they are memory free so there's no annoying twisting.

The teal-coloured end caps, carrying the floral print, ensure that work stays put on the cable should it be necessary to remove a needle. The cable keys, used for tightening the tips to the cable, have a colour coordinated top.

The Mindful Collection Cables will work with all KnitPro needles
